Introduction to Database

MidTerm Quiz-2 (Summer 23-24)

(Total – 5x4 = 20)

Name:

ID:

CUSTOMER

C_ID	C_NAME	C_PHONE	C_ADDRESS	PUR_AMOUNT	BRANCH	PUR_DATE
601	TASNUVA	58369	BANANI	1500	GULSHAN	22-NOV-2023
602	AFIA	74234	-	500	DHANMONDI	16-DEC-2022
603	AMRIN	96384	JATRABARI	300	MALIBAG	26-MAR-2022
604	MAYESHA	-	KURIL	150	GULSHAN	16-DEC-2020
605	TASNUVA	35789	-	2500	MALIBAG	23-OCT-2020

1. Write a SQL to show the information of the customers who purchased on Victory Day.

2. Write a SQL which will replace unknown phone numbers (Number type) with “No Phone Number” and after replacing, it will count the number of phone numbers that are stored. If the counted number is greater than 4, it will output “An unknown phone number is found”, otherwise it will output, “No unknown phone number is found”. **(Bonus = +1)**

3. Write a SQL to find out branch wise average of purchase amount where average is greater than 500 and branch is not Dhanmondi.

4. Write a SQL to find the lowest purchase amount.

5. Show the use of TO_Date() function on Customer table.
