Compute average baud rate and minimum bandwidth requirement for 2B1Q, if data Rate is 44 Kbps and case factor, $c = 0.5$

Ans.

For 2B1Q

$$r = \frac{\text{Data Element}}{\text{Signal Element}}$$

$$= \frac{2}{1} = 2$$

Baud rate, $S = \frac{c \times N}{r}$

$$= \frac{0.5 \times 44 \times 10^3}{2}$$

$= 11,000$ baud

(11 k baud)

Minimum Bandwidth,

$$B_{min} = \frac{N}{4}$$

$= 11$ KHz
